

An exclusive tour of the GoProto Manufacturing Facility

Society of Automotive Engineers - Australasia 2019 Site Tour Series

GOPROTO SITE TOUR

GoProto provides rapid prototyping and contract manufacturing services. Utilising Hewlett Packard Multi Jet Fusion (MJF) 3D printing technology, GoProto (ANZ) is Australia's first contract manufacturing facility offering on-demand production without the need for tooling.

Based in Mount Waverley, GoProto has commissioned its first two HP Jet Fusion 4210 printers, which are up to 10-times faster than existing rapid prototyping and 3D printers.

GoProto's ambition is to reinvent the way the world designs and manufactures, enabling companies to shorten and localise the design and manufacturing cycle. Traditional 3D printing technologies lack the combined precision, speed and functionality that's demanded by mainstream manufacturing. HP's MJF technology changes this dynamic by printing high-end, functional prototypes and production parts.

General Manager, Leon Gairns, runs GoProto's extensive portfolio of prototyping and manufacturing services. For more information visit www.goproto.com.au.

Tour attendees will benefit from the following:

- Learn how HP's Multi-Jet technology works
- Find out how HP's additive manufacturing process is an economical low volume alternative
- Find out how automotive/transport companies have applied the technology
- Touch and feel MJF 3D printed samples
- See the machines in operation

Tour numbers are limited so register now.

Event Details

DATE

THURSDAY 28 MARCH 2019
5.30PM - 7.00PM

ADDRESS

12-14 RICKETTS ROAD
MOUNT WAVERLEY
VIC 3149

COST

MEMBERS: \$20.00
NON-MEMBERS: \$30.00

REGISTER AT

WWW.SAEA.COM.AU/EVENTS
REGISTRATION CLOSES
25/03/19
