

# Wacol Plant, Brisbane Australia

Reliable, efficient and tough. We have built more than 60,000 Volvo and Mack trucks since 1972.

## Highly customised trucks for local conditions.

We listen to our customers to produce trucks that are locally engineered, to suit Australian conditions and individual customer requirements.

**Over 70%**  
customisation for  
both brands

**3000+**  
trucks completed per  
year

**10**  
years average service  
by employees

## Key Points in History

**1972** Volvo Trucks first established a production facility in 1972, building heavy duty trucks in Wacol, Brisbane, Queensland.

**2002** Mack is integrated into the factory. Australia becomes one of the only factories producing both Mack and Volvo under the same roof.

**2014** Axle assembly is bought in house to ensure higher quality products.

**2017** The factory receives Australia Made certification due to the high level of locally made components.

## Meet some of the team

The future for Australia is about more than plants and dealerships - it's about people.

We embrace a culture of career development, skill development opportunities, and internal staff progression to create the managers of tomorrow.

Our team is diverse - we have over 40 different nationalities and a range of different roles and skills required.

We are one Volvo team.

Debbie Pollock  
Assembler – Axle Line

*"I've been working for Volvo now almost 8 years. I'm quite proud of the experience I've had working with the company."*

Colin Kaye  
Warehouse

*"I started working in the Warehouse at Volvo right after I finished high school. I enjoy the role as I help others and the company achieve productivity levels."*

James Bell  
Auto Electrician

*"Volvo has and continues to create pathways for me to further educate myself and to further my career."*
