

ATCx AUSTRALIA & NEW ZEALAND

Altair is pleased to invite you for the annual ANZ ATCx on 20 July, 2018 at Royal Melbourne Yacht Squadron. This year's event will build on the success of last year with a spectacular new venue and interesting keynotes & technical presentations and exhibitors that have drawn a positive feedback from past attendees.

First 80 registrations received by **July 13**, will get a **Bottle Opener** – designed using

3D Printed by Renishaw

Topology Optimisation in
solidThinking Inspire & 3D
Printed in titanium using
Renishaw ALM machines.

This conference provides a unique opportunity to experience how leading organizations are increasingly adapting virtual simulation as the key enabler to address product design and manufacturing challenges. Altair domain experts will present how Altair solutions – CAE/CFD, HPC Cloud, Electromagnetic simulation, Model Based design, IoT and engineering consulting can be used to increase development productivity and bring innovative and profitable products to market faster than ever before. Besides exciting keynotes and customer presentation, a new segment focussing at Start-up's will add to the overall interest quotient this year.

Friday July 20, 2018

Royal Melbourne Yacht
Squadron Pier Rd, St Kilda
VIC 3182, Australia
