

OPERATIONS PLANT TOUR

An exclusive tour of the Volvo Group Trucks Operations Plant

Society of Automotive Engineers - Australasia 2019 Site Tour Series

VOLVO GROUP TRUCKS OPERATIONS PLANT TOUR

VOLVO
VOLVO GROUP

SAE-A invites you to join us for an exclusive tour of the Volvo Group Trucks Operations Plant in Wacol, Queensland.

The Australian market is very demanding on the truck industry, with customers requiring a high degree of customization to meet their specific needs. The Wacol plants achieves this customization by incorporating a high degree of human input in the factory. This means that their trucks are essentially handmade with care and concern for the customer's needs.

A tour of the Wacol plant will be enlightening to industry insiders and the uninitiated, giving insight into the goings on of the plant and what goes into a proudly Australian made truck.

Expect a comprehensive tour of the factory, going down the production line from bare chassis rails to completed truck, with frequent stops at work stations, detailing the processes on the production line.

Tour numbers are limited so register now.
